Driving the future in compression therapy

A strong brand. A wide product range.
Concepts for life.

medi World of Compression: A signpost to the future with more than 65 years’ competence in the field of compression. We can help you by supplying the highest quality, innovation and design.

Effective treatment concepts

Great potential in lymphoedema therapy arises when able to offer innovation with each phase of treatment.

As the specialist you can offer your patient quality products that will help them live their life happily.
We have the direct connection

To communicate.
To co-operate.
To be there for each other.
The medi service team respects and values this requirement seriously.

Our team in Hereford offer a wealth of experience in compression therapy and the team in the field can visit you and help where necessary.

We also have a team of clinicians on hand for telephone advice.

Quality Certificates

As a manufacturer of medical products, medi has a high regard and awareness for quality. Product and system certificates prove that all legal requirements are met.

**CE mark**
Our medi medical products meet all of the requirements of the European Directive 93/42/EEC and of the German Medical Devices Act. In accordance with regulations, our products are subject to the conformity assessment procedures and are granted the CE mark. As a kind of "passport for industrial products", the CE mark guarantees free trade within the European Economic Area (EEA).

**Quality label**
Our medical compression hosiery is regularly checked by the Hohenstein Research Institute according to the quality and test provisions of the RAL-GZ 387. As confirmation that our products meet the quality conditions, you will find the quality label printed on the packaging.

**Textile trust quality seal**
All compression stockings and garments, whether circular-knit or flat-knit, thrombosis prophylaxis stockings and supports are regularly examined and rated according to strict standards by independent test centres for any toxic substances potentially damaging to human health. Granting of the Oeko-Tex Standard 100 certificate guarantees: tested quality for the protection of your health.

**DIN EN ISO 9001:2000 / DIN EN 13485**
medi maintains the quality management system according to DIN EN ISO 9001:2000 and DIN EN 13485. Since 1996, we have demonstrated our ISO 9000 status to our customers with a certificate. From this time, medi has exploited the opportunities offered by this standard to continually improve products from the business units Phlebology, Orthotics and Hospital in order to organise safer and more efficient processes and procedures. We define customer satisfaction as a decisive measure of quality.

**Hohenstein testing device – HOSY**
Graduated compression is the most important feature of a medical compression stocking. Hosy testing ensures our products are safe to use.

More than just a manufacturer

medi produces medical aids for a variety of conditions and life situations. But we don’t see ourselves solely as a manufacturer. On the contrary, we handle our own research and development, technology, production, marketing and sales in-house – always keeping our focus on the market, its demands and variables, and the medi vision.

medi offers products in five business divisions: Phlebology, Hospital, Orthopaedics, Wound Care and Footcare. These products are used and distributed by medical supply stores, hospitals and clinics, doctors’ practices and therapists.

In other words, specialists who know which users need which aids to improve their quality of life.

What we’re proud of and what makes our products so special is that they’re all completely free of negative side effects.

Our range of products primarily includes medical compression stockings for people with vein disorders, lipoedema and lymphoedema, supports and braces for the conservative and post-operative treatment of orthopaedic injuries and disorders, stockings for the prevention of thrombosis, compression for use after vein surgery, compression garments for use after plastic and cosmetic surgery plus a variety of therapy-supporting products.
juxtafit®
adjustable compression devices

Adjustable compression devices for the treatment of lymphoedema.

The range of juxta is the cost-effective alternative to short stretch and multi-layer bandage systems. Juxta products guarantee a constant compression level and feature a fast and easy donning and doffing system. The ability to instantly readjust the juxta system helps to consistently apply compression to a reducing limb. This is not possible with bandaging without completely removing the layers. Juxta garments promote self-management techniques and improve patient compliance.
juxta features

Overview of juxta characteristics.

- **Built-In-Pressure system card**
  To set and control the correct therapeutic level of pressure.

- **Juxtaposed band system**
  Ensures a perfect fit as the straps can be individually adjusted while on the limb.

- **Variety**
  Wide range of styles and sizes available.

- **Easy handling**
  Easy donning and doffing promotes patient empowerment.

- **Inelastic**
  Core technology of all juxta products.

- **All circaid devices are latex-free.**

Juxta adjustable compression devices are engineered with the ability to be set to precise compression ranges with a graduated compression profile from the ankle to the upper arm.

The user-friendly design of the juxta Built-In-Pressure system card (BPS) enables patients to achieve the necessary compression ranges needed for the treatment and management of lymphoedema.

With the juxta Built-In-Pressure system card, patients are able to set their prescribed compression range while donning their garment and to readjust the compression range during the day as needed. Therefore, the appropriate compression range is ensured throughout the period of wear. Simultaneously, it is very simple to verify the correct range of applied pressure.

Inspiration from nature.

Giraffes have venous pressures of more than 250 mmHg at their ankles, three times more than humans. However, giraffes do not suffer from lymphoedema or venous disorders. The answer is the skin: giraffe skin is inelastic, meaning it does not stretch. Therefore, giraffes are not susceptible to lymphoedema or venous diseases even though they may be on their feet 24 hours a day. juxta has incorporated this concept into its products creating solutions for an increased patient compliance and a better quality of life. The founder’s wife suffered from lymphoedema for years without finding a successful treatment. When her husband—an engineer and inventor—saw the pain his wife was in, he knew he had to find a solution. The result was the first patented circaid legging (short for circulation aid) inspired by the inelastic skin giraffes have. It literally put his wife back on her feet to resume a normal and active life. This core technology would evolve into juxta products.
mediven embodies appropriate compression stockings for almost every indication in modern oedema therapy. They are tailored in detail to the needs of the patients.

mediven lymphoedema garments stand for maximum wearability and convenience while at the same time offering optimum medical effectiveness. mediven products lead the market in terms of major quality criteria such as: material selection, graduated compression, comfort and design, resulting in happy patients and optimum treatment results.
mediven® features

These powerful product features speak for themselves.

**Clima Comfort**
- for perfect climate exchange
  - Well-being all year round
  - Highly active breathing
  - Prevents itch

*Now scientifically tested (Institut Francais du textile et de l’habillement (IFTH), Clima Comfort Test, Villeneuve d’Ascq, 2010.)*

**Clima Fresh**
- for more freshness for the whole leg
  - Antibacterial effect in the knit
  - Binds odours
  - Special spinning technique that guarantees the effect, even after washing

**Perfect Fit**
- Very precise compression dosing
- Optimum medical care conditions

**Special measurements to fit personal needs**
- Individual made-to-measure garments for severe indications, unusual limb shapes or for special characteristics

**Anatomical oblique borders as standard (distal and proximal)**
- Unimpeded lymphatic drainage without circular constriction
- Optimum fit and better hold

**Power yarn for pressure over an area**
- Deep acting pressure over larger areas
- More stable and less elastic for effective treatment of oedema
- Optimum pressure stability, all day long

**Flat seam with elastic seam tape**
- Resistant to chafing and wear-and-tear
- For more freedom of movement

**Easy to care for**
- Suitable for the delicates programme of washing machines and tumble driers

**Textile trust**
- Guaranteed hypo-allergenic and latex-free

All mediven stockings are latex-free.

medi Therapy Concept Lymphology

Effective lymphoedema treatment.

Driving the future in compression therapy.

1 Phase
Clean
Skin care in the initial phase
• UCS Debridement

2 Phase
Reshape
Adjustable compression device – effective and easy to self-manage
• juxtafit

3 Phase
Maintain
Wide range of mediven and juxta compressive solutions – for individual requirements
• mediven flat knit
• juxtafit

Clean
Efficient skin care to reduce the risk of developing cellulitis.

Reshape
Reducing leg circumferences within the decongestive lymphatic therapy and to stabilise fluctuations in swellings.

Maintain
Compression devices for maintaining best therapy results.

medi I feel better.
The development of a lymphatic disease increases the burden on the skin, therefore skin care is an important part of daily care in lymphoedema.
UCS Debridement

UCS Debridement – a pre-moistened, sterile debridement system to enable good cleansing of the skin.

**Benefits**
- Surfactant will offer a deep clean – the solution in the cloth penetrates the skin offering a more effective deep clean than water alone can
- Allantoin – is a keratolytic which softens the hard dry skin and helps to safely remove hyperkeratosis
- Aloe vera – is soothing to the skin and helps to moisturise
- Debridement cloth will help to take away any flaky dry skin
- Daily use for a short period of time will improve the dry skin condition
- Can be used to clean away old emollient

**Use**
Straight from the pack without adding any other solution. Leave on skin to continue the benefits – air dries.

**juxtafit® lower leg**

Adjustable compression products for the lower limb.

**Indications**
- Lymphoedema, stage 1 – 3

**Product features**
- High quality band fasteners for a longer product life span
- Guaranteed compression profile
- Built-In-Pressure system card (BPS) to set and control the correct therapeutic pressure range
- Garment straps can be individually readjusted while on the limb
- Anti-odour and anti-microbial fabric
- Latex free for skin-friendly wearing comfort
- Sustained compression for up to 24 hours a day if required
- Time-saving application
- Minimal education required
- For patients who are unable to apply medical compression stockings

**Benefits**
- Promotes self-management: instantly adjustable
- Promotes patient empowerment: easy donning and doffing process
- Promotes a better quality of life: removable for bathing and skin care
- Promotes normal range of movement

**Variants**
- Lower leg: available in 8 sizes (S – XXL, M / L / XL extra wide) and 2 lengths (petite and standard)
- Lower leg available with single band ankle foot wrap

**Your order includes**

- 1 adjustable compression device
- 1 pair of undersleeves lower leg silver
- 1 cover up
- 1 single band foot wrap
- 1 pair of compression anklets
- 1 juxta Built-In-Pressure system (BPS) guide card
juxtafit® essentials
upper leg with knee

Adjustable compression products for the upper leg with knee.

Indications
Lymphoedema, stage 1 – 3

Product features
- High quality band fasteners for a longer product life span
- Guaranteed compression profile
- Built-In-Pressure system (BPS) to set and control the correct therapeutic pressure range
- Garment straps can be individually readjusted while on the limb
- Anti-odor and anti-microbial fabric
- Latex free for skin-friendly wearing comfort
- Sustained compression for up to 24 hours a day if required
- Time-saving application
- Minimal education required
- For patients who are unable to apply medical compression stockings

Benefits
- Promotes self-management: instantly adjustable
- Promotes patient empowerment: easy donning and doffing process
- Promotes a better quality of life: removable for bathing and skin care
- Promotes normal range of movement

Variants
- Upper leg with knee: available in 6 sizes (XXS – XL) and 3 lengths: 35cm (x short), 45 cm (short), 55 cm (long)
- All thigh garments come with silky cover up in black

Features for upper leg
- Smooth material in the back of the knee – for more wearing comfort
- Garment straps trim option – for individual needed length of the straps
- Length trim option (5cm) – for a better fit
juxtafit® essentials upper leg with knee

Your order includes
- 1 adjustable compression device
- 1 pair of undersleeves whole leg standard
- 1 cover up
- 1 juxta Built-In-Pressure system (BPS) guide card

juxta foot options

Additional compression for foot and ankle.

power added compression band (pac band)

- Targets the arch of the foot and around the malleoli for stubborn oedema
- Used in combination with the circaid compression anklet for added compression
- Can be trimmed to fit almost every foot shape
- Lightweight and breathable material
- Available in standard and large
- Bilateral use (left or right foot)

The long-term management of lymphoedema relies on effective mediven compression.

1 Phase
Clean
Skin care in the initial phase
- UCS Debridement

2 Phase
Reshape
Adjustable compression device - effective and easy to self-manage
- Juxtafit

3 Phase
Maintain
Wide range of mediven and juxta compressive solutions - for individual requirements
- Mediven flat knit
- Juxtafit

Maintain Phase
Product overview leg in the Maintenance Phase

With juxtafit and mediven products you can offer individual solutions for the patient’s needs and requirements.

The mediven high quality flat knit range offers your patient comfort and clinical effectiveness. Available in different fabrics and varieties to suit the individual. Offering a wide range of colours lymphoedema patients have the option of combining their garments with their wardrobe.

juxtafit promotes self care for patients due to the instant readjustability, and they are an easy garment to apply and remove.
mediven® 550 leg

Highest wall stability and almost unlimited variety – for oedema up to stage 3.

Suitable for
- soft to firm connective tissue

Indications
- Primary and secondary lymphoedema stages 1, 2 and 3
- Lipoedema stages 1, 2 and 3
- Severe phlebological conditions with a tendency to develop oedema
- Keloid treatment, e.g. after burns
- Post-operative and post-traumatic oedema
- Mixed forms such as phlebolymphoedema, lipolymphoedema

Product features
- Highest working pressure
- Many combination options with special extras such as soft toe, gluteal shaper, hallux or varus ease zone, flexure functional zones
- Multipart garments available
- Fashionable variety: 4 standard colours, 9 trend colours and 3 unique Design-Elements and 4 Fashion-Elements

Available with sparkling Swarovski® crystals*

**Combination of below knee stocking (AD), capri panty (CT) and cycling shorts (FT)**

**Combination of below knee stocking (AD) and CT leg section**

**Men’s leotard (ATH)**

**One-legged pantyhose (ATE)**

**medi tip**
Lymphoedema treatment with compression garments does not always involve a pair of stockings or tights. Sometimes due to the clinical presentation of an individual, therapeutic efficacy and comfortable compression can only be achieved by dividing the compression into 2 or 3 segments (combination garments).
**mediven® 550 toe cap**

**Highest wall stability and almost unlimited variety – for oedema up to stage 3.**

**Indications**
- Lymphoedema of the forefoot and toes
- Lymphoedema of the dorsum of the foot

**Product features**
- Toe cap with Clima Fresh: reliably prevents odour and colonisation by bacteria
- Top and bottom principle:
  - Seams moved to the upper and lower surfaces of the toes in the direction of lymphatic drainage
  - Lateral seams give every toe stability for an effective action
- Each single toe made to measure anatomically for an optimum fit
- Optional integration of medi lymphpads for additional pressure in lymphoedema of the dorsum of the foot

**Seamless toe cap**
- Care to suit the indication for optimum lymphatic drainage (no circular seams)
- Available in variants AB, AB1, AD, AF, AG, AT, ATH, ATU, ATE / ATEH

**Individual toe cap**
- Increased treatment compliance due to quick and easy donning
- Individual care options, e.g. nightwear or combination with other product variants

**Compression**

Product overview arm in the Maintenance Phase

With juxta and mediven products you can offer individual solutions for the patient’s requirements.

The juxta products and the mediven high quality flat knit range offer your patient choices for promoting self care.

Following the motto “Live, Laugh, Love” medi has developed an arm sleeve collection, that offers lymphoedema patients a unique and effective choice. The arm sleeves are available in different colours and can be refined with attractive patterns.

Juxta arm sleeves can be used as an alternative to compression arm sleeves or as a nighttime garment. Easy to apply and remove, they are beneficial for people who are unable to apply or tolerate traditional compression.

Comprehensive and effective round-knitted armsleeve.

**Benefits**
- The double ellipses on the point and in the flexure of the elbow offer freedom of movement. They are designed to assist with lymphatic drainage and to reduce wrinkles to a minimum to prevent soreness.
- The anatomical shape of the armsleeve ensures easy and correct donning and doffing.
- The hand part of the combined armsleeve offers two flat seams and a wedge at the web of the thumb. This reduces the tension and increases wearability.
- The silicone topband is knitted to the armsleeve with a flat seam.

**Indications**
- Shoulder arm vein thrombosis
- Post-operative and post-traumatic oedema
- Primary and secondary stage 1 lymphoedema of the arm

*These indications should be seen as recommendations. The garment model and the strength of pressure required, i.e. the compression class, depend on the diagnosis, the treatment site, the clinical findings and the patient’s susceptibility to oedema. Please also consider the patient’s individual requirements and the circumstances (joint flexibility, mobility, BMI, state of their skin and tissues, etc.).

**Colours**
- Standard length: Sand

Sometimes it is difficult for patients to put on their compression stockings. medi offers a large selection of practical donning and doffing aids. For patients with sensitive skin there is also a special skin care series by medi. The rich ingredients pamper the skin and help it regenerate.
medi
Donning and doffing aids

medi Butler

Benefits for patients:
- Quick and simple donning of compression stockings
- Less effort required
- Wide choice for the most individual demands

medi Export Butler with long handles

The ideal donning aid for all compression stockings wearers who can comfortably don their stockings without assistance. The long handle ensures maximum stability when putting on compression stockings and pantyhose.

medi skin care

The development of a lymph disease increases the burden on the skin. The stretched wall of the vein leaks fluids into the surrounding tissue. The increased loss of water from the surface of the skin makes it more prone to injury. In order to enhance the success of compression therapy, products have been developed to meet the specific requirements of an affected leg.

medi day – care gel for day time use

Benefits
- Fresh feeling all day long.
- Reduces the feeling of tension and the sensitivity of the skin.
- Contains horse chestnut for help with vein health.
- Refreshing menthol and witch hazel stabilizes the tissue structure.

Use medi day directly before putting on the compression garments and let the day begin!

medi night – care cream for night time use

Benefits
- For a comforting and intensive moisturising of the skin overnight.
- With jojoba oil – for a soothing action on the outer skin layer.

Apply medi night after taking the compression stockings off – for a relaxing night’s sleep.

medi fresh – cooling spray

Benefits
- Instant refreshment for when you are out and about.
- Menthol gives your skin a cooling sensation.

Easy to use: spray directly onto the garment at any time and enjoy an immediate soothing effect.

medi Lymphpads

Professional therapy support.

Why use medi Lymphpads?
- They stimulate the microcirculation
- They increase lymph drainage
- They loosen tissue induration and fibrosis
- They support treatment of oedema

Product strengths
- Active breathing material
- Can be trimmed to the desired size and thus have very flexible handling
- Washable up to 40°C

Handling in detail
medi Lymphpads are safe and simple to use. They can be trimmed to size or used as whole sheets. During the decongestion phase the structured surface is placed on the skin and secured with bandages. If required, the lymphpads can alternatively be integrated in the compression garment during the maintenance phase.

When are medi Lymphpads used?
medi Lymphpads are used for specific pressure distribution or to increase pressure over critical zones (e.g. around the malleoli or over the dorsum of the hand). In these areas, the compression may not always be adequate due to the patient’s physical situation. Optimum results are then achieved in combination with the medi Lymphpads.
